

About the Sun Link Operations & Maintenance Facility

Basics

- Located at 290 E. 8th Street
- Hub of Sun Link streetcar operations, communications, repair, maintenance, and personnel
- Future home to Tucson's 8 *Made in America* streetcars

Features

- 3 high profile, enclosed service bays for streetcar repair and maintenance
- A master control and communications center
- Extensive parts inventory plus testing and calibration equipment
- High pressure wash for exterior streetcar cleaning & interior cleaning and detailing equipment
- Administrative offices and facilities for Sun Link personnel
- State of the art power generation and security systems
- Public art by Simon Donovan and Ben Olmstead

An Energy-Efficient, Green Facility

- Design & site orientation takes advantage of natural lighting
- 75% of construction waste recycled & diverted from landfills
- On-site rainwater harvesting basins
- Water efficient & native landscaping
- Waterless urinals and low flow fixtures
- Solar water and heating
- Ready for future photo-voltaic solar power generation
- Expected to achieve a Leadership in Energy and Environmental Design (LEED) New Construction Silver rating

Designed by GLHN Architects & Engineers, Inc., a Tucson-based company
Constructed by D.L. Withers Construction, L.C., an Arizona-based company
